

# 1978. Employees Whose Manager Left the Company

## Description

Table: `Employees`

+-----+-----+		
Column Name	Type	
+-----+-----+		
employee_id	int	
name	varchar	
manager_id	int	
salary	int	
+-----+-----+		

In SQL, `employee_id` is the primary key for this table.  
This table contains information about the employees, their salary, and the ID of their manager. Some employees do not have a manager (`manager_id` is null).

Find the IDs of the employees whose salary is strictly less than `$30000` and whose manager left the company. When a manager leaves the company, their information is deleted from the `Employees` table, but the reports still have their `manager_id` set to the manager that left.

Return the result table ordered by `employee_id`.

The result format is in the following example.

### Example 1:

**Input:**  
Employees table:

+-----+-----+-----+-----+			
employee_id	name	manager_id	salary
+-----+-----+-----+-----+			
3	Mila	9	60301
12	Antonella	null	31000
13	Emery	null	67084
1	Kalel	11	21241
9	Mikaela	null	50937
11	Joziah	6	28485
+-----+-----+-----+-----+			

**Output:**

+-----+	
employee_id	
+-----+	
11	
+-----+	

**Explanation:**  
The employees with a salary less than \$30000 are 1 (Kalel) and 11 (Joziah).  
Kalel's manager is employee 11, who is still in the company (Joziah).  
Joziah's manager is employee 6, who left the company because there is no row for employee 6 as it was deleted.
