

739. Daily Temperatures

Description

Given an array of integers `temperatures` represents the daily temperatures, return *an array* `answer` *such that* `answer[i]` *is the number of days you have to wait after the* `ith` *day to get a warmer temperature*. If there is no future day for which this is possible, keep `answer[i] == 0` instead.

Example 1:

Input: `temperatures = [73,74,75,71,69,72,76,73]`
Output: `[1,1,4,2,1,1,0,0]`

Example 2:

Input: `temperatures = [30,40,50,60]`
Output: `[1,1,1,0]`

Example 3:

Input: `temperatures = [30,60,90]`
Output: `[1,1,0]`

Constraints:

- `1 <= temperatures.length <= 105`
- `30 <= temperatures[i] <= 100`
