

520. Detect Capital

Description

We define the usage of capitals in a word to be right when one of the following cases holds:

- All letters in this word are capitals, like `"USA"` .
- All letters in this word are not capitals, like `"leetcode"` .
- Only the first letter in this word is capital, like `"Google"` .

Given a string `word` , return `true` if the usage of capitals in it is right.

Example 1:

```
Input: word = "USA"  
Output: true
```

Example 2:

```
Input: word = "FlaG"  
Output: false
```

Constraints:

- `1 <= word.length <= 100`
- `word` consists of lowercase and uppercase English letters.
