

# 404. Sum of Left Leaves

## Description

Given the `root` of a binary tree, return *the sum of all left leaves*.

A **leaf** is a node with no children. A **left leaf** is a leaf that is the left child of another node.

### Example 1:

**Input:** `root = [3,9,20,null,null,15,7]`

**Output:** 24

**Explanation:** There are two left leaves in the binary tree, with values 9 and 15 respectively.

### Example 2:

**Input:** `root = [1]`

**Output:** 0

### Constraints:

- The number of nodes in the tree is in the range `[1, 1000]`.
- `-1000 <= Node.val <= 1000`
