

# 2082. The Number of Rich Customers

## Description

Table: Store

```
+-----+-----+
| Column Name | Type |
+-----+-----+
| bill_id     | int  |
| customer_id | int  |
| amount      | int  |
+-----+-----+
bill_id is the primary key (column with unique values) for this table.
Each row contains information about the amount of one bill and the customer associated with it.
```

Write a solution to report the number of customers who had **at least one** bill with an amount **strictly greater** than 500.

The result format is in the following example.

### Example 1:

```
Input:
Store table:
+-----+-----+-----+
| bill_id | customer_id | amount |
+-----+-----+-----+
| 6       | 1           | 549    |
| 8       | 1           | 834    |
| 4       | 2           | 394    |
| 11      | 3           | 657    |
| 13      | 3           | 257    |
+-----+-----+-----+

Output:
+-----+
| rich_count |
+-----+
| 2          |
+-----+

Explanation:
Customer 1 has two bills with amounts strictly greater than 500.
Customer 2 does not have any bills with an amount strictly greater than 500.
Customer 3 has one bill with an amount strictly greater than 500.
```
