

40. Combination Sum II

Description

Given a collection of candidate numbers (`candidates`) and a target number (`target`), find all unique combinations in `candidates` where the candidate numbers sum to `target` .

Each number in `candidates` may only be used **once** in the combination.

Note: The solution set must not contain duplicate combinations.

Example 1:

Input: `candidates = [10,1,2,7,6,1,5]`, `target = 8`

Output:

```
[
  [1,1,6],
  [1,2,5],
  [1,7],
  [2,6]
]
```

Example 2:

Input: `candidates = [2,5,2,1,2]`, `target = 5`

Output:

```
[
  [1,2,2],
  [5]
]
```

Constraints:

- `1 <= candidates.length <= 100`
- `1 <= candidates[i] <= 50`
- `1 <= target <= 30`
