

# 551. Student Attendance Record I

## Description

You are given a string `s` representing an attendance record for a student where each character signifies whether the student was absent, late, or present on that day. The record only contains the following three characters:

- `'A'` : Absent.
- `'L'` : Late.
- `'P'` : Present.

The student is eligible for an attendance award if they meet **both** of the following criteria:

- The student was absent ( `'A'` ) for **strictly** fewer than 2 days **total** .
- The student was **never** late ( `'L'` ) for 3 or more **consecutive** days.

Return `true` *if the student is eligible for an attendance award, or* `false` *otherwise* .

### Example 1:

**Input:** `s = "PPALLP"`

**Output:** `true`

**Explanation:** The student has fewer than 2 absences and was never late 3 or more consecutive days.

### Example 2:

**Input:** `s = "PPALLL"`

**Output:** `false`

**Explanation:** The student was late 3 consecutive days in the last 3 days, so is not eligible for the award.

### Constraints:

- `1 <= s.length <= 1000`
- `s[i]` is either `'A'` , `'L'` , or `'P'` .
