

101. Symmetric Tree

Description

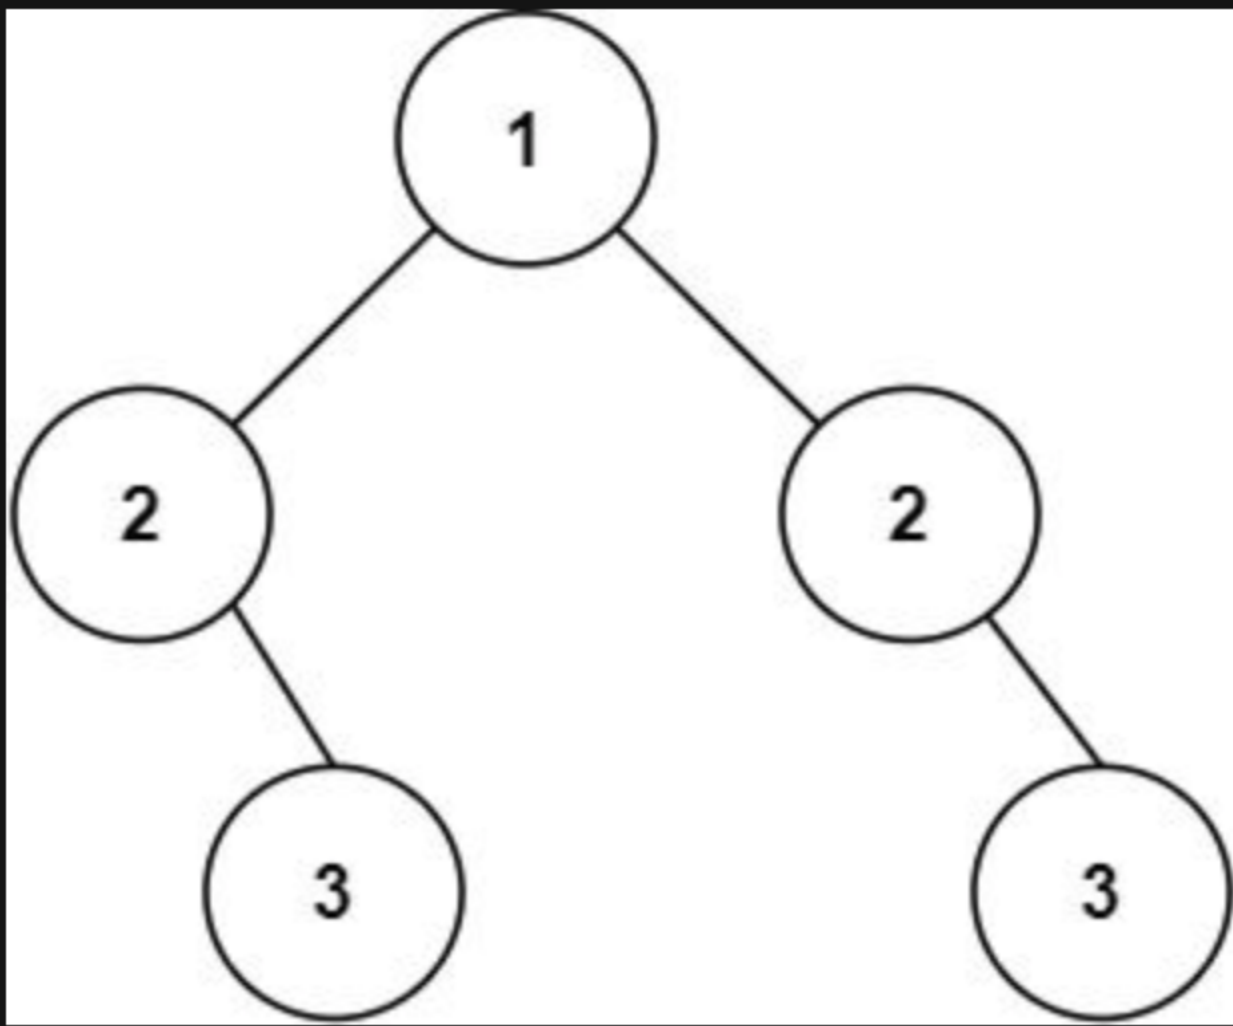

Given the `root` of a binary tree, *check whether it is a mirror of itself* (i.e., symmetric around its center).

Example 1:

Input: `root = [1,2,2,3,4,4,3]`
Output: `true`

Example 2:

Input: `root = [1,2,2,null,3,null,3]`
Output: `false`

Constraints:

- The number of nodes in the tree is in the range `[1, 1000]`.
- `-100 <= Node.val <= 100`

Follow up: Could you solve it both recursively and iteratively?
