1556. Thousand Separator

Description

Given an integer `n`, add a dot (".") as the thousands separator and return it in string format.

Example 1:

```
Input: n = 987
Output: "987"
```

Example 2:

```
Input: n = 1234
Output: "1.234"
```

Constraints:

- `0 <= n <= 2`^{31}` - 1`
