3090. Maximum Length Substring With Two Occurrences

Description

Given a string `s` , return the **maximum** length of a substring such that it contains *at most two occurrences* of each character.

Example 1:

Input: s = "bcbbbcba"

Output: 4

Explanation:

The following substring has a length of 4 and contains at most two occurrences of each character: `"bcbb bcba "` .

Example 2:

Input: s = "aaaa"

Output: 2

Explanation:

The following substring has a length of 2 and contains at most two occurrences of each character: `" aa aa"` .

Constraints:

- `2 <= s.length <= 100`
- `s` consists only of lowercase English letters.
